Press release

VINCI Airports presents its extended business aviation offer at EBACE 2017

- **First joint participation of VINCI Airports to EBACE since the recent integration of Lyon-Bron Airport, the third airport of the sector in France**
- **Extensive business aviation network in the French Southeast Region with 5 airports (Chambéry, Grenoble, Clermont-Ferrand, Toulon and Lyon-Bron)**
- **Construction of a new business aviation terminal at Grenoble airport; Renovation of the business terminal in Chambéry**

From 22 to 24 May 2017, VINCI Airports is present at the European Business Aviation Convention & Exhibition (EBACE), a premier event and annual venue for the European business aviation community. As a key player in the sector, VINCI Airports continues to develop its offer in the French South-East region, with 5 specialized airports.

Chambéry Savoie Mont-Blanc, Clermont-Ferrand Auvergne, Grenoble Alpes Isère, Toulon Hyères and Lyon-Bron Airports each benefit from exceptional geographical locations.

Lyon-Bron Airport, handled by VINCI Airports since November 2016, is the gateway to the city of Lyon, the economic, cultural and gastronomic metropolis, for business aviation customers. Open 24 hours a day, Lyon-Bron Airport is 100% dedicated to business aviation and can accommodate any type of aircraft.

Recording a 4% business aviation traffic growth in 2016 compared to 2015, Grenoble and Chambéry Airports offer direct access to the ski slopes of the Alps; Chambéry Airport being one hour away by car or 15 minutes away by helicopter from Courchevel and Méribel. For the 2016/2017 season, the terminal dedicated to business aviation at Grenoble Airport has been completely rebuilt and the one at Chambéry Airport has been renovated to accommodate customers with tailor-made services in dedicated areas close to airline parkings.

Toulon-Hyères airport, in the heart of the Var, is ideally located between Provence and the French Riviera and is the closest airport to Saint-Tropez. It can accommodate any type of aircraft.

Thanks to the construction of a terminal dedicated to business aviation and the development of new services dedicated to business customers, Clermont-Ferrand Airport's traffic grew by 4% in 2016, compared to 2015.

Each of these 5 airports is supported by VINCI Airports, both for operations and handling. This single point of entry allows for quick processing of applications, but also for regional cooperation in the event of high traffic or disruptions.

About VINCI Airports

VINCI Airports, a top 5 global player in the international airport sector, manages the development and operations of 35 airports: 13 in France, 10 in Portugal (including the hub of Lisbon), 3 in Cambodia, 2 in Japan, 6 in Dominican Republic and Santiago airport in Chile. Served by more than 200 airlines, VINCI Airports' network handled 132 million passengers in 2016.

Through its expertise as a comprehensive integrator and the professionalism of its 11,000 employees, VINCI Airports develops, finances, builds and operates airports, leveraging its investment capability, international network and know-how to optimize the management and performance of existing airport infrastructure, facility extensions and new construction. In 2016, its consolidated revenue amounted to €1.05 bn.
