

Portuguese airports with the biggest growth ever

- Portuguese airports traffic increased by 11 % in 2015
- More than 20 million passengers in Lisbon
- Traffic reached 8.1 million passengers in Porto, 6.4 million in Faro, 2.7 million in Madeira and 1.6 million in the Azores.
- 25 new routes

2015 was a year of records in Portuguese airports.

With a total of 38.9 million passengers, which sets a new high, the growth rate compared to 2014 is 11 %. The global success comes from the fact that all the Portuguese airports have reached last year the best results ever.

Lisbon Airport exceeded 20 million passengers, ie an increase of 10.7% over the previous year. In the last three years the airport in the capital increased by 4.8 million passengers, while in the eight previous years the increase had been 4.6 million.

Porto Airport reached 8.1 million passengers, up 16.7%, or 1.2 million passengers more than in 2014.

In Faro, the growth was 6.4% to 6.4 million passengers, while **Madeira** airports reached 2.7 million passengers, 6.3% more than last year. The largest percentage increase was recorded at airports in the **Azores**, where growth was 25.7% to 1.6 million passengers.

The sustained passenger growth in recent years results from the attractiveness of the airports network and the effort to attract new routes and airlines. On the other hand, the last two years were marked by strong growth in low cost traffic, especially in 2015, when the growth of low cost companies was quite higher than in the traditional segment.

The growth in air traffic is, according to the regulatory model, the lever for investments in capacity increase, which are critical to continue growing and to continue to contribute to the development of the regions.

2015 Global numbers

About VINCI Airports

VINCI Airports, an international airport operator, manages the development and operations of 25 airports: 11 in France, 10 in Portugal (including the hub of Lisbon), 3 in Cambodia and one in Chile (since October 1st). Served by over 100 airlines, VINCI Airports' network handles 47 million passengers annually in 2014, with a turnover of € 717 million¹. Through its expertise as a comprehensive integrator and the professionalism of its 5,400 employees, VINCI Airports develops, finances, builds and operates airports, leveraging its investment capability, international network and know-how to optimize management of existing airport infrastructure, facility extensions and new construction.

On December 14, VINCI Airports has acquired AERODOM, Concessionaire Company until 2030 of 6 airports in the Dominican Republic, which traffic was 4.3 million passengers in 2014.

On December 15, VINCI Airports, in consortium with the Japanese company ORIX, signed a contract with the New Kansai International Airport Company for the 44-year Concession of Kansai and Osaka international airports (34.6 million passengers in 2014).
